MISCELLANEOUS.

WE ASSERT THIS STARTLING FACT W We can prove by our books that throut of every five persons that consume a case of the famous ETNA MINERAL WATERS I of the famous ATNA MINERAL WATERS re-ceive direct and certain benefit, for our ledger shows that three out of every five that purchase the first case return for the second, third, fourth and fifth, many of them continuing its use in-definitely. It is a certain specific for Liver and Kidney Disorders, Dyspepsia and Rheumatism. This is not merely a statement, but a fact estab-lished by our sales, in hundreds of instances of over twenty consequitive cases to the servers. lished by our sales, in hundreds of instances of over twenty consecutive cases to the same person. Another significant evidence lies in the fact that although the astonishing effect of these mineral waters was not generally known on the subject of public discussion till within the last three mouths, yet within that time, in fact, since April 11th last, the sales have increased till they are now eight times whatthey were at that date. SHOCKING DEATH.

Man Crushed Between a Moving Car and a Bank of Earth.

Santa Rosa, September 6th.—An Italian named Ralph Gurrie met with a horrible accident which resulted in his death, at Guernes & Murphy's logging camp, near Guerneville, Sunday. According to the most accurate reports received, Gurrie, with a number of his fellow-countrymen, was standing upon an empty flat car, which was moving slowly through a narrow defile between two steep, high banks. At the narrowest point in the pass he attempted to spring upon the bank, which was scarcely eight inches from the side of the car, but slipped and fell.

The space being too narrow to permit of the passage of his body, his legs were caught below the knees between the bank and the side of the car, the movement of which caused his body to and a Bank of Earth. the knees between the bank and the side of the car, the movement of which caused his body to maintain a whirling motion at a velocity proportionate with the speed of the car. His body, in its rapid revolutions resembled an auger as it sank lower and lower. His companions were powerless to relieve him from his agony. As the auger-like motion continued it appeared as if the internal organs were being erowded upward and must find an outlet. Every drop of blood seemed crowded into his head and neck, the veins swelling in great knots, the flesh changing to a dark blue and the eyes on the point of bursting from their sockets. As the wider and firmer parts of his body near the shoulders came in contact with the car it acted like a wedge and stopped the train. His mangled body was extricated with great difficulty and brought to this city on the afternoon train and rought to this city on the afternoon train an taken to the County Hospital, where soon after. Deceased was aged 34 years.

THE GRAPE INTEREST. Wine-Growers a Little Anxious on Ac count of the Rain-storm.

It was learned to-day at the headquarfers of the state Viticultural Commission that the wine-growers cherish the hope that the present moist weather may be followed by a dry spell, for it such is not the case crops like that of Zinfandel and kindred varieties, which grow in thick clusters close to the ground, will suffer seriously from rot. The rain, however, will—it is thought—have a good effect on fermentation throughout the State, but if the rain continues in all probability the wine-growers will be obliged to use sugar to give strength to their wine. A similar course has been resorted to in previous wet seasons.

wet seasons.

From the present outlook it is considered probable that the wines of the vintage of 1887 will improve the prices of those of the vintage of 1886, as the wine crop of that year was manifestly superior to that of the present season. Table-grapes will be severely injured by the wet spell, a fact which will cause no little loss and disappointment to many producers.

MORE INDIAN TROUBLES. Some Danger of the Blackfeet Indiana

Going on the Warpath.

Butte (Montana), September 6th.—A special to the *Mmer* from Caigary, Northwest Territory, says: Trouble is feared among the Blackfeet Indians. About ten days ego an Indian was shot at by a white soldier for some trifling cause and seriously hurt. His tribe were much incensed, and at one time it was thought they would attack his assainant. After a few days the wounded Indian died, and the news was sent through all the tribes. Simultaneously another Indian, named Deerfoot, escaped from jail here and reached the reservation. The police demanded his return, but the braves refused to divulge his hiding-place. Consequently, on the morrow two large detachments of mounted police, under Colonel Herchmer, will proceed to the reservation from here and Fort McLeod, and effect Deerfoot's capture. Another force has been dispatched from Regina as a reserve. With the present excited state of feeling among the Indians serious trouble is feared, and the residents of Calgary feel the most lively alarm. The Blackfeet are the most powerful tribe in the Northwest, and would be a terrible foe if they went on the warpath. There is also no doubt but if they break out other tribes, no tably the Crees, will follow them on the warpath. Going on the Warpath.

MACKAY'S LINES. Strong Belief that a Telegraph Monopoly Will Soon be Announced.

Copyright, 1887, but he California Associated Press. [Copyright, 1887, by the California Associated Press.]

New York, September 6th.—The World says:
There are several good reasons for believing Jay
Gould will acquire within a very short time not
only the Baltimore and Ohio Telegraph Company, but Mackay's Commercial Company, as
well as thousands of miles of land lines.
Mackay practically owns that negotiations have
been in progress for some time, conducted by
Gould and Mackay personally whenever Mackay
has been in New York, and in his absence by S.
M. L. Barlow, counsel for Mackay, and Dr.
Green. At these conferences the books, particularly of the Commercial Company, were freely
shown. The negotiations have not been interrupted for a day since Mackay's return from
Europe last month. There is every prospect
that the broad scheme of cable and telegraph
competition in the interest of the general public that the broad scheme of cable and telegraph competition in the interest of the general public will go the way of many smaller and earlier enterprises. One thing which stands in the way of Mackay's turning over the properties to his rival is the question of pride. Mackay does not want to sell out and vanish utterly from public gaze, and then be rediculed by those who had bailed him as the sworn eternal foe of the telegraph monopoly. He wants to figure in the combined company somehow or other. He desires a prominent place in the reorganized Board. Dr. Green is quoted as saying: "A fortycent cable rate would be fixed in case of a consolidation."

GERMAN CATHOLICS. The Knights of Labor Denounced as a

Socialistic Body.

CHICAGO, September 6th.—At the session of the German Catholic Conference last evening the President made an address of greeting. He claimed that the attitude of German Catholics toward other nationalities had been misrepresented, and that false reports had been circulated. In his opinion the German Catholic recognized no distinction of nationalities. He asked the delegates to use no hard expressions against other nationalities. Germans in America were obliged to receive the German language in their schools. On account of that they had been reproceeded with trying to Germanize. After the appointment of committees a resolution was offered by Mr. Meitch, of St. Paul, urging all Catholic working people to keep away from the so-called Knights of Labor, as he failed to see any difference between the Knights of Labor and other Socialists' and prohibited societies. Mr. Powderly had openly shown himself to be a Prohibitionist and an enemy of the Germans.

The resolutions were reterred to a committee on labor matters. Socialistic Body.

The resolutions were referred to a committee on labor matters.

An interesting "question of principle" was raised when the report of the society of New Orleans was read, which was written in the English language. Objection was made to receiving it on that account.

Dr. Toppert moved that the Secretary be instructed to find out whether the German language was employed as the official medium of that society or not, and if not, that the Secretary notify the society that the Central Union received the reports of no society but such as employed the German language exclusively. Referred to the Committee on Constitution.

A cablegram was ordered sent to Pope Leo congratulating him upon his approaching jubilee, and asking his blessing.

THE KNIGHTS OF LABOR MATTER. Chicago, September 6th.—In the German Catholic Conference to-day the resolutions denouncing the Knights of Labor were reported back unfavorably to the Convention. An animated discussion ensued, but the report was finally adopted unanimously.

HENRY GEORGE. The United Labor Party's Chieftain Un-

bosoms Himself. Copyright, 1887, by the California Associated Press. New York, September 6th.—[Special.]—The Mail and Express has interviewed Henry George at great length. George says that the split with the Socialists was inevitable, as the Union Labor the Socialists was inevitable, as the Union Labor Party has never been Socialistic. The Syracuse Convention acted in self-defense. He says he expects the Labor Party to poll seventy-five thousand votes in this city, twenty thousand in Brooklyn, and one hundred thousand in the State outside of these two cities. It is the only "live" party in the country. State outside of these two cities. It is the only "live" party in the country.

The parting from the Socialists' will both weaken and strengthen it. "We will," he says, "lose a certain number of votes, and also a number of energetic and capable workers. On the other hand, we will gain by the accession of a large class who hitherto have held aloof for fear that the United Labor party was but socialism and anarchism masquerading under another name. We also lessen opposition from many people who heartily subscribe to our principles, but who have believed that a party based upon those other principles would be dominated by cranks or theorizers."

THE EXETER HOLOCAUST. The Awful Manner in Which Scores of

Victims Met Their Deaths.

London, September 6th.—The victims by the burning of the Theater Royal last night were mostly working people. As soon as the flames were put out a large force began searching for bodies. The stairway leading to the gallery was literally packed with bodies, while at the head of the stairs there were scores of others piled one on top of another. The unfortunate victims had rushed to the stoor when the alarm was given, but soon the stairway was blocked and rescape cut off. In a short time the flames had reached them, and they suffered horrible deaths. There were pitiful scenes in the vicinity of the burned theater this morning, as the friends and relatives of the supposed victims awaited the recovery of their hodies. In many cases fathers and mothers both perished, and numerous children are thus left without means of support. Several bodies were burned so that only a small cinder remained. The number of persons severely injured is 60. It is feared the deaths will reach 140.

HEARTRENDING DETAILS OF THE DISASTER. Victims Met Their Deaths.

HEARTRENDING DETAILS OF THE DISASTER HEARTRENDING DETAILS OF THE DISASTER.

LONDON, September 6th.—It is ascertained that there were 200 persons occupying seats in the gallery, and of these 100 lost their lives.

The search for bodies still goes on. It is very probable the total deaths will never be ascertained, owing to the fact that many bodies were completely calcined.

Two stalls of the stables belonging to a hotel adjoining are filled with remains, but it is impossible to identify them. Most of the killed were adults, and chiefly men, but a few childer perished. The charred remains of twenty persons were discovered in one heap. A mother, father and child were found elasped in one embrace.

In nearly every case the clothing had been orn off of the victims. From many of the bodies limbs were missing, and the remains showed evidence that they had been wrenched off. Several whole families, numbering two tofive persons, lost their lives.

The construction of the gallery staircase accounts for the great loss of life. Half-way down
there was a sharp angle. The first persons who
left the gallery got past safely, but several of
those who followed were thrown and jammed
into the angle and were unable to extricate
themselves, owing to the pressure from behind.
The staircase at this place was effectually
blocked, and there was no other way of escape.
The scene-shifter says the fire started among
some gauze which became ignited, and the
flames spread to the scenes, of which the stage
was unusually full. The audience numbered

IT WAS A DRAW. Sunday's Bloodless Battle on the Hills of Ballycoree. Record-Union's Special Cablegram—Copyrighted by the New York Tribune.

London, September 6th.—Both sides claim a victory at Ennis. Perhaps the truth is that neither side was completely triumphant. The Government stopped the holding of the meeting at the place announced, and Dillon and his friends held another some miles off, and this the police and military broke up when discoverd. Dillon's speech in the House of Commons last week was understood to signify that force would be met by force, and the odium of bloodshed was to be laid on the Government, but more prudent councils prevailed. There was little stone-throwing at police last night, no serious collisions and not a shot was fired. The Government may be glad to get off so easily. The odium of suppressing public meetings is quite enough, without using musketry. Philip Stanhope's presence at Ennis was meant to indicate the sympathy of English Radicals. He announced himself as a representative of the English people, and is nevertheless a brother to Earl Stanhope.

HIGH LICENSE AT OAKLAND, The Mayor Vetoes the Recent Ordinance

Reducing the Rate on Saloons. At the recent mass meeting held in Oak-and to condemn the City Councilmen who sold out to the saloon interests and passed an ordinance to reduce the license on sa-loons from \$100 to \$50 per month, the fol-

owing resolutions were passed:

lowing resolutions were passed:

Whereas, A high license ordinance in accordance with public sentiment duly ascertained and determined was passed by the preceding City Council; and whereas, the present City Council has veted to repeal the said high license ordinance; therefore be it Resolved. That such action is in direct opposition to the will of the people expressed at the ballot-box and recently emphasized by them in mass meeting assembled.

Resolved, That all the members of the City Council who voted for the reduction of the liquor license have violated their trust and forfeited the confidence of the people whom they were elected to serve. The members from the Second and Seventh Wards are doubly recreant, because they have not only assisted to reverse the will of the people, but have violated their pledged word. They being, therefore, unfit to sit as members of the City Council, their resignation is demanded.

Resolved, That we respectfully petition his Honor, Mayor Davis, to veto the ordinance just passed by the City Council, because it does violence to the sentiments of a large majority of the city of Oakland, and is contrary to their expressed will.

The resolutions were unanimously adopted, and, on motion, an amendment was adopted providing that a copy of the resolutions be presented to the City Council.

Yesterday the Mayor complied with the last resolution and vetoed the reducing ordinance. The veto message was greeted with great applause by the lobby. Much anxiety is feit as to the result of the next meeting of the Council, but it is believed that the ordinance cannot be passed over

For Contra Costa, Assessor Williams, Super-risor Galindo and Auditor Curry appeared; for Mendocino, Supervisor Hyatt, Assessor Smith and District Attorney Manon ap-peared. In each case it was contended that the present assessments are just and fair in valuation, and that any increase will work injustice to the taxpayers. As portion of the afternoon was consumed in hearing Mendocino county more at length. ORDINANCE NO. 223.

An Ordinance granting to Edwin K. Alsip and L. L. Lewis certain Street Rallway privileges in, on and over certain streets herein named, and granting permission to propel cars upon tracks on such streets by wire ropes running under the streets by wire ropes running under the streets and moved by stationary engines, and to propel cars thereon by electricity or electric process.

THE BOARD OF TRUSTEES OF THE CITY of Sacramento ordain as follows:

Section 1. There is hereby granted, subject to the provisions of the Civil Code and the laws of the State of California, to Edwin K. Alsip and L. L. Lewis and their heirs and assigns, for the period of fifty years from the date hereof, authority to construct, lay down, run, operate and maintain a single or double track railway, with all necessary and convenient tracks for curves, switches, turnouts, side-tracks, appurtenances, apparatus and appendages in, over and along the following streets, in said Sacramento city, to wit: Commencing at a point or place on Third street (to be selected by the grantees) at or near where said Third street extended meets the lands owned or held or used by the Southern Pacific Company for depot purposes, and running thence along said Third street, and in, over and along Third street, and in, over and along Third street, in, over and along Ninth street to Ninth street; in, over and along Ninth street to Ninth street; in, over and along Twenty-eighth street to be southern boundary of Y street or the southern boundary line of said city of Sacramento. Also, commencing at the intersection of Ninth and N streets, and running thence in, over and along J street to the eastern boundary of Sacramento city. Also, commencing at the intersection of Ninth and N streets, and running thence in, over and along J street to the eastern boundary of Sacramento city. Also, commencing at the intersection of Ninth and N streets, and running thence in, over and along J street to the eastern boundary of Sacramento city. Also, commencing at the intersection of Ninth a

also hereby granted to said Edwin K. Alsip and L. L. Lewis, their heirs and assigns, to propel cars upon tracks upon said streets by electric process, or by means of electricity, and permission and authority are granted to them, their heirs and assigns, to erect, build, construct, operate and maintain the necessary and proper motors, batteries, wires, apparatus, machinery and appliances for the running and operation of cars upon tracks by means of electricity. They shall have the right to adopt at any time any improvement in the electric process that may be discovered or used.

liscovered or used.

The special reasons for the grant of permissi and authority to propel cars upon tracks on the streets named in this ordinance by electric pro-cess, or by the use of electricity in such mode as may be usual, or that may be deemed proper, are as follows:

road.

Second—The streets of Sacramento city are level (except where sloped to meet the grade), and run in straight lines. For this reason an electric road can be operated more satisfactorily then any other.

and run in straight lines. For this reason an electric road can be operated more satisfactorily than any other.

Third—Owing to the simplicity of the machinery and apparatus used to operate a road by electricity, accidents are not likely to happen and the probability of the machinery becoming out of repair is very small.

Fourth—A horse-car road will not meet the demands of a rapidly growing city, but an electric road, while run at a comparatively cheap cost, will afford every possible opportunity for public travel.

Fith—The electric system of operating street railboads is now highly perfected. The means of applying electricity as a motive power, is now engaging and will continue to engage the best scientific and inventive thought of the age. Improvements undoubtedly will be made in this process from time to time, and the city of Sacramento will be in a position to derive whatever advantage there may be in successive improvements and discoveries in the mode of applying electricity as a motive power.

Sixth—An electric road is not attended by noise in its operations, is always under control and is perfectly safe.

Seventh—Should any accidents occur in the electric apparatus, the same can be speedily repaired without serious interruption to travel.

ner as may be selected by the grantees, their heirs and assigns.

Section 4. This grant of authority is made upon the following conditions:

First—The cars must be of the most approved construction for comfort and convenience of passengers, and provided with brakes to stop the same when required.

Second—The tracks must be constructed as nearly as possible in the middle of the street.

Third—The grantees, their heirs and assigns must plank, pave or macadamize the entire length of the street used by their track between the rails and for two feet on each side thereof, and between the tracks, if there be more than one, and keep the same constantly in repair, flush with the street and with good crossings.

Fourth—The tracks must not be more han five feet wide within the rails and must have a space between them sufficient to allow the cars to pass each other freely.

Fifth—The rates of fare must not exceed ten cents for one fare or twenty-five cents for four fares.

Sixth—The rate of speed must not be more than cents for one fare or twenty-five cents for four fares.

About noon yesterday three young women, who seemed to be out for a good time, enjoyed themselves riding in a buggy on J and other streets, and kept their horse proving briskly by frequent applications of moving briskly by frequent applications of the silk. They had a collision with a Chinaman's wagon at Fourth and J streets, breaking one of the shafts of their vehicle. The horse started to run, and before he was quieted their buggy collided with a hack at Fifth and J streets and they were all dumped out. One of them, the driver, seemed at first to be considerably hurt, and was taken into Gus. Lavenson's store, the others meanwhile expressing their firm conviction that she "couldn't drive a little bit." Finally they all pulled themselves together and took a hack for home, not much the worse for their adventure.

Mr. Devlin said it might be well to strike Mr. Abbott's name from the franchise, as he had withdrawn from the enterprise, but the proposition was not pressed. The Mayor put the question upon the passage of the ordinance granting the fran-

He was present to call the attention of the Board to other matters in the franchise which he considered ded attention, in the interest of the city Mr. Devlin interposed an objection to the objection. The duty of the Improvement Association's committee ended with the adoption of the amendment relative to the

time of commencement of the work and the amount to be done per year. Of course Mr. Dray had a right to appear for himsel but his duty as a representative of the Improvement Association was over. That body was satisfied with the ordinance as amended, and wanted it passed. Mr. Dray replied that he was willing to be considered as representing himself, and that he also represented some prominent citizens who had called his attention to matters in the franchise in which the public was interested. He was not fighting the franchise, and was not opposed to it; but there were two or three things in it that should be attended to before it was passed, as sometime the franchise might pass into the hands of other parties than

MILLINERY OPENING

Next Thursday,

Should be as far ahead of last Spring's as that opening was when compared with those of seasons before.

If our business efforts have had no other influence, they have at least done much toward raising the standard of styles and qualities in our midst.

Never quite content with the past, we have every season done our utmost to show better goods and better styles, until now our customers have come to be fully as exacting and as discriminating in their tastes as the largest city retailer could wish for.

These higher demands have, on the other hand, done much to develop OUR skill and care and judgment.

THURSDAY

Will be a test day for all these qualities, and it will be for you to judge how much advance we have made in

SAN FRANCISCO MARKET.

SAN FRANCISCO, September 6th.
FLOUR—Fair trade in progress. Prices easy.
We quote net cash prices for California: Best
Family, \$4 10@4 30 \(\) bbl; Bakers' extra, \$4@
4 20; Superfine, \$2 90@3 20.'
WHEAT—The situation is unchanged. Sample
trade is nominal, and there are no transfers on
shipping account that would afford an exact
quotation for spot lots for export purposes. So
that from \$1 22½ to \$1 25 \(\) extra unust be accepted
as an approximate range for No. 1 Shipping.
Millers pay from \$1 40 down, according to quality. The inquiry for milling is fair, but the dety. The inquiry for milling is fair, but the de-mand is easily satisfied and trade in this line is oo small to impart much life to the market. CALL BOARD SALES—MORNING SESSION.
